Making it happen

Complete the look...

and add extra kerb appeal

A garage is often used as a very functional space, but that doesn't mean it should be overlooked when it comes to design. Your choice of garage door can have a real impact on the look of your home, and it can help to make your garage a far more usable space.

Anglian garage doors are made to measure using high quality products and designed to suit your home. We have a great range of styles and colours to choose from with automation available on some of our doors to make everyday life that bit easier and cutting edge security features for extra piece of mind.

with...

Anglian Home Improvements

"It's made a lot of difference. We don't have to get out of the car and open the garage door"
Mr & Mrs. Solloway

Make it yours...

and enjoy a cheerier exterior

Here at Anglian we make your garage door especially for you, which means you get to decide exactly how you'd like it to look! Over the next few pages, we've pulled together some of the materials and styles for you to choose from and discover those all-important finishing touches.

Our options allow you to choose a stylish garage door for your home which also provides the security levels and functionality to best suit how you use your garage space. Don't forget our expert advisors are happy to help you every step of the way.

Key features

- Remote control as standard
- Fitted with anti-lift locking straps
- Anti-drop device
- External emergency release available
- Security light supplied as part of the control unit
- Option of a Compact design (slimmer laths) to allow maximum drive through
- Alarm system fitted as standard

45

Roller doors

Our roller doors will help to transform your garage, both inside and out. Made from aluminium sections, and filled with foam, they provide excellent sound proofing and thermal insulation, ideal if you want to use your garage as an extra room.

Electrically operated, and with automatic lighting, the door rolls up onto a drum when opened to give you full access to the roof space at all times. Security features include anti-lift locking straps and built-in tamper alarm as standard, making these doors a great option for a garage which is also used as a workshop.

Remote control: easy to use with added safety and security

At the touch of a button your garage door will glide open and the security light will come on. You'll never have to brave the cold again! There are also no locks to be tampered with and the electric motor prevents the door from being forcibly lifted when it is closed. A manual emergency release lock will always be installed where the main garage door is the only means of access. Plus, for added peace of mind, the door will automatically reverse direction if it comes into contact with an obstruction, keeping you, your car and your family safe.

Roller door hardware, and optional upgrades

Remote control

Remote control is included as standard. The transmitter can easily be added to your car keyring and additional remote controls can be supplied.

Security light

The security light automatically switches on when the remote control is operated and is supplied as part of the control unit.

Wall Controls

In addition to remote control there is an option of a wall control, operated from both inside and outside of your home.

Emergency Release

This is compulsory if the garage door is the only entrance into the garage. By removing a key locked barrel, the octagonal rod can then be used to open and close the door.

Key features

- Available in high-impact glass reinforced polyester (GRP) or high-grade galvanized steel
- Made to measure for a perfect fit
- Built onto a strong, corrosion protected framework
- Option of retractable or canopy gear
- Multipoint locking operated by a lockable handle
- Automation available for remote control access
- Glazing options on some designs
- Low maintenance and long lasting

One-Piece Doors

Our one-piece up and over doors are individually designed to fit your garage perfectly combining strength and style in a single package. Made to measure using either robust, high-impact Glass Reinforced Polyester (GRP) or high-grade galvanised steel. Each one is built onto a strong protected steel frame and fitted with multi-point locking and operated by a security lock as standard. Quite simply, they are designed to look great but to be secure, low maintenance and long-lasting.

There is an extensive range of styles to choose from, including the option to add glazing to some designs or automation for extra ease.

One-Piece hardware and optional upgrades

Retractable Door Gear

One-piece up and over doors are supplied with a fully retractable gear as standard, which runs on tracks horizontally back into the garage. There is an additional option of a canopy gear, which leaves approximately a third of the door protruding from the front of the garage when open.

Wall Control

A wireless internal wall control button is included with the automatic opening option, this conveniently opens and closes the garage door without the need of the remote control or key.

Handles

Black key lockable handles are supplied as standard (retractable handle shown) unless a remote-control option is selected.

Wireless Keypad

An external wireless keypad which controls the garage door by entering a 4-digit code is available as an optional extra.

Remote Control

Remote control for automatic opening is an optional upgrade for retractable one-piece doors, offering quick and easy access to the garage. Supplied with two hand transmitters and a wireless wall control button as standard.

Glazing Options

A selection of the one-piece doors can be supplied with a range of glazing including opaque black, clear or stippled perspex and with optional decorative lead effect designs.

Key features

- Available in high-impact glass reinforced polyester (GRP) or high-grade galvanized steel
- Made to measure for a perfect fit
- Built onto a strong, corrosion protected steel chassis
- Equal split leaves as standard, with option on steel doors for a third split primary door
- Multipoint latching operated by a lockable handle
- Glazing options on some designs
- Weather seals fitted as standard to help prevent draughts inside the garage
- Low maintenance and long lasting

Side Hinged Doors

Traditional, side hinged doors are back in fashion, but we've given them a performance upgrade and are perfect when frequent access is required but not wanting to open the garage door completely.

Without compromising on looks, we've combined modern materials and cutting-edge technology to provide added security and increased durability. Manufactured from either Glass Reinforced Polyester (GRP), which is an incredibly strong, dent resistant modern composite laminate or high-grade galvanised steel with a protective zinc coating. Both material options are built onto a strong, corrosion protected steel chassis which provides a protective 'picture frame' edge all around the door panel and shoot bolt latching provides that added protection.

Weather seals are fitted between the frame and the door leaves providing additional barriers against the elements. Every door is individually made, and all designs are available with equal half split leaves and the steel doors have the additional option of a third split design to give the option of a primary door. All you have to do is choose from the excellent range of styles and colours available.

Side-Hinged hardware and optional upgrades

Handles

Black key lockable lever handles are supplied as standard for the inside and outside of the main opening door.

Glazing Options

A selection of the side-hinged doors can be supplied with a range of glazing including opaque black, clear or stippled perspex and with optional decorative lead effect designs.

Steel Chassis

Side Hinged doors are built as standard onto a strong protected steel chassis, providing a protective 'picture frame' edge all around the door panel.

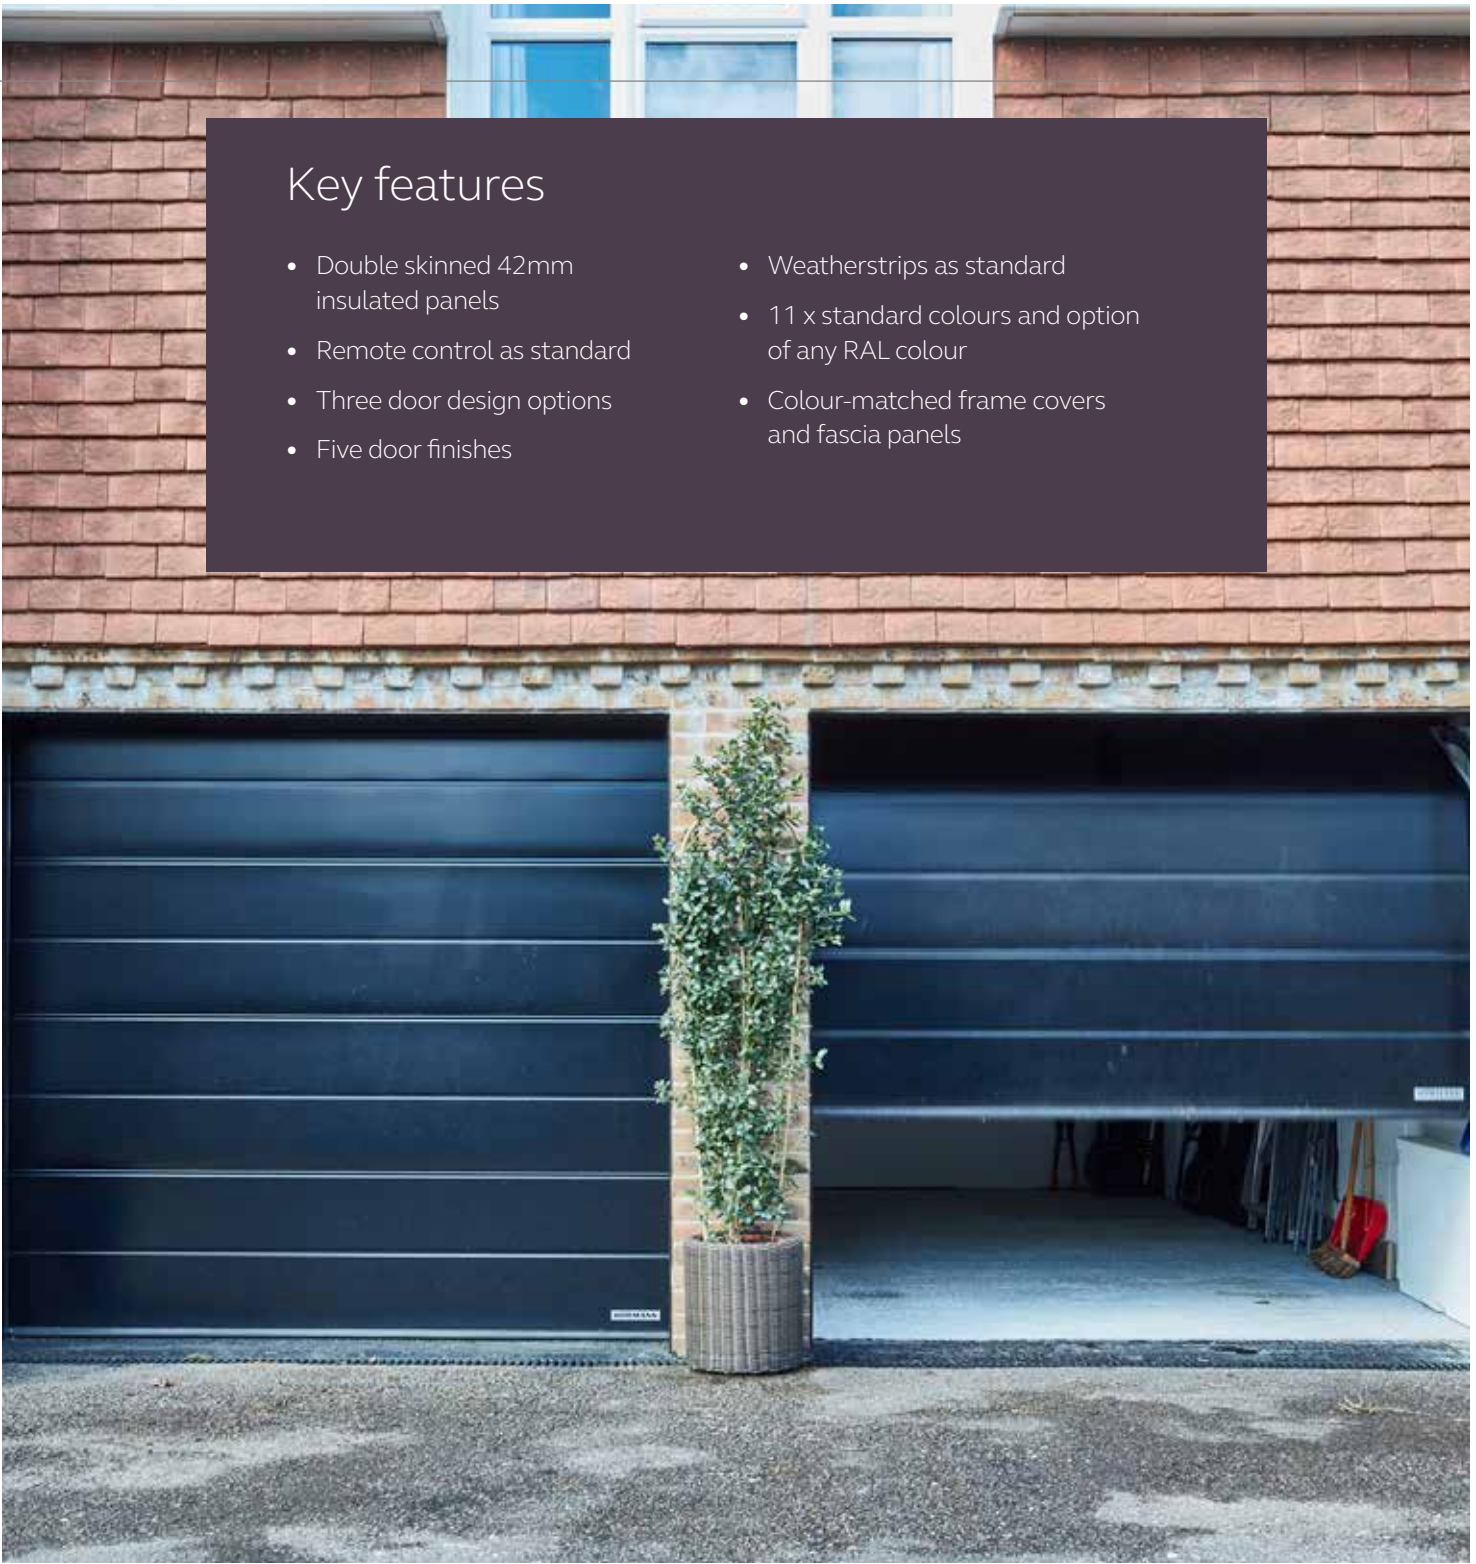

Restrictors

Restrictors are fitted to each door as standard to keep the door open and to help prevent it blowing shut (image shows restrictor on steel side-hinged door).

Key features

- Double skinned 42mm insulated panels
- Remote control as standard
- Three door design options
- Five door finishes
- Weatherstrips as standard
- 11 x standard colours and option of any RAL colour
- Colour-matched frame covers and fascia panels

1. Narrow Board

2. Wide Board

3. Georgian

Steel Sectional Doors

The steel sectional doors combines extensive security and strength with the opportunity to maximise space and add great kerb appeal.

The solid construction of double skinned 42mm insulated panels, with weatherstrips and anti-lift kits fitted as standard, deliver an elite level of performance.

The convenience of automation is included as standard and the state-of-the-art vertical opening system adds the luxury of extra space. When open, the doors are neatly suspended under the ceiling, giving you more room inside your garage and the option to make full use of your driveway by comfortably parking up close to the door.

The performance of these doors is also matched in style. Choose from three different door design options, as shown below, and five different finishes ranging from silky smooth to woodgrain embossed. There's also an extensive array of colour options, with all frame colours and fascia panels matched to the door itself for a stylish, uniform appearance.

Steel Sectional door options

There is a choice of three different designs, so you can find the best match for your home.

- 1.** The Narrow Board provides a clean and consistent appearance, with evenly spaced sections that look practically invisible when the doors are closed.
- 2.** The Wide Board design offers a more contemporary look while still providing aesthetic consistency.
- 3.** The Georgian design is a more traditional and timeless option, with every individual panel exactly spaced to give a uniform appearance.

All three styles can be supplied with or without glazing.

Sectional Doors hardware, and optional upgrades

Retractable door gear

Sectional doors are supplied with a fully retractable gear as standard, which runs on tracks horizontally back into the garage.

Remote control

Remote control is included as standard. The transmitter can easily be added to your car keyring and additional remote controls can be supplied.

Security light

Built-in energy efficient LED lighting activates when the remote control is operated, and automatically switches off after 2.5 minutes.

Weatherstrip

Weatherstrips are standard on our Sectional doors, offering increased weather protection.

Glazing options

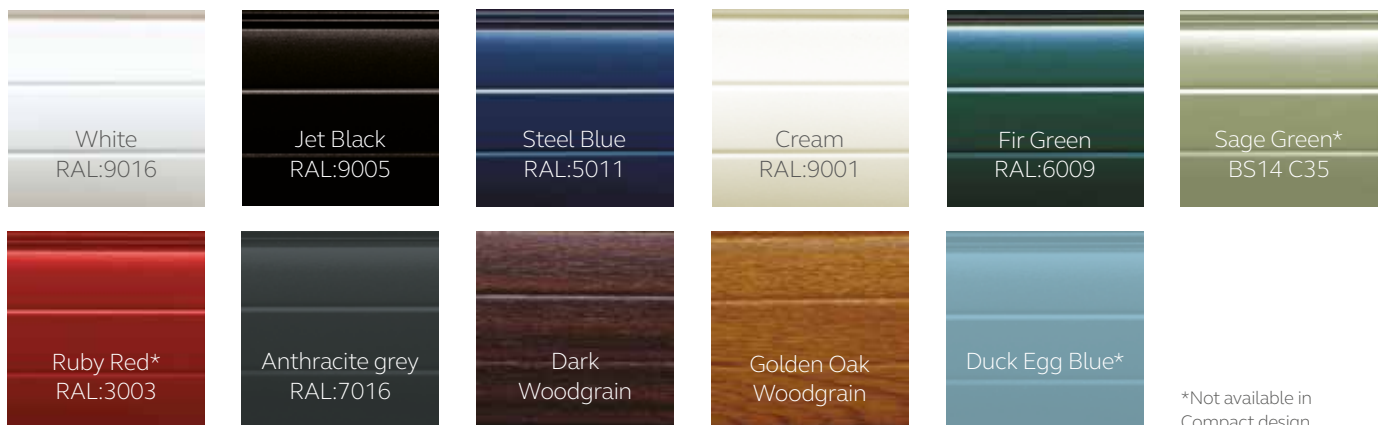

Sectional doors can be supplied with clear privacy glazing if required.

Colours to complement

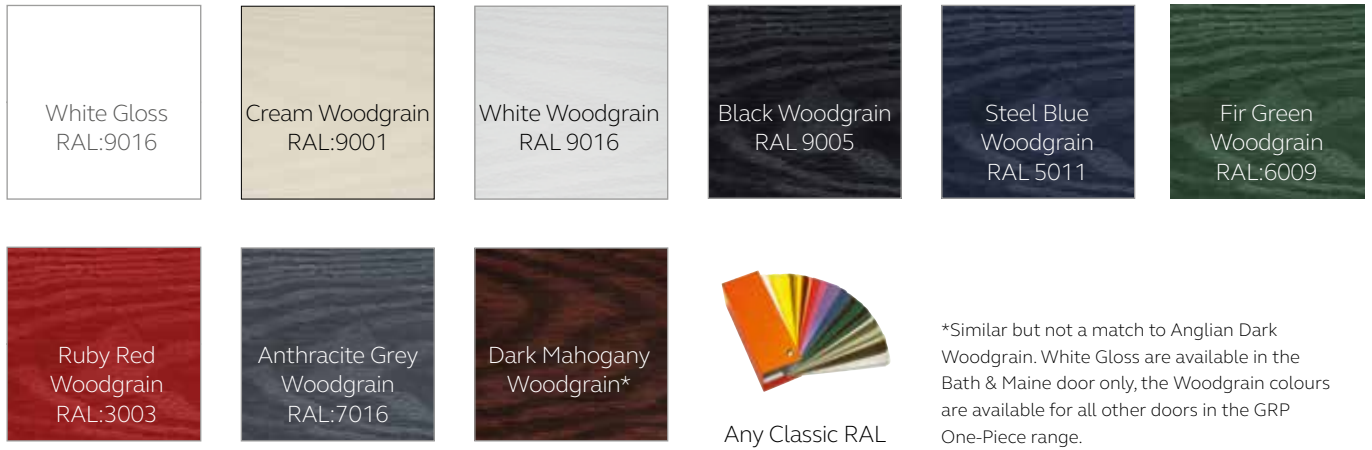

Complete the look of your garage

We understand that your garage door is likely to have a big impact on the overall look of your home, making the final colour choice an extremely important decision. As you'll see from the following pages, we offer an excellent range of attractive colours and finishes, whichever material or style you choose. There's a variety of rich, warm colours and classic, sophisticated shades, as well as bright and fresh neutrals. With something to suit every taste, you're sure to find the perfect match for your home.

Making a mark

The finer points are important

All our products are manufactured to the relevant British Standards and where possible seek approvals from rigorous third party bodies – not every company does this - ensuring that our products meet the very highest of industry standards always.

We also take our guarantees seriously, with a full 5-year guarantee on all our steel garage doors and 2-years on the GRP range.

*Exclusions apply.

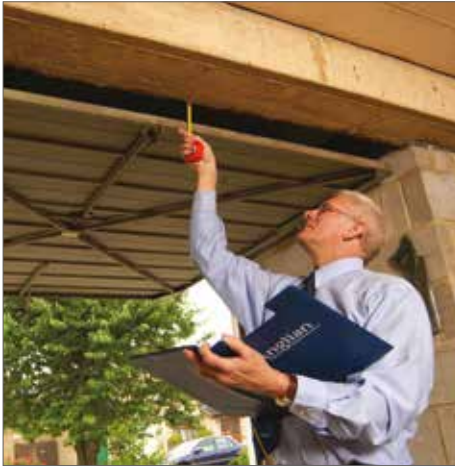

Making it happen

Your project takes shape

From the moment you contact us, to the completion of your Garage door installation, you can be assured that we will be dedicated to giving you the best and most trouble-free service possible throughout the whole project.

We provide all the know-how, advice, experience and excellent workmanship to guarantee that your new garage door installation runs smoothly and efficiently. We will take care of everything for you, including disposing of your old door and frame, making the whole process straightforward and easy. Our installers are friendly, helpful, tidy and most of all completely dedicated to doing a highly professional job.

We want you to be absolutely delighted with your new installation – and we are determined that you will be.

1

After we have taken all the measurements, your garage is made to measure here in the UK to your specifications.

2

We carefully remove your old garage door and frame and take these away to responsibly recycle. We then prepare the opening ready to install the new door.

3

If a new frame is required, this is fitted first, followed by the door panel and the door gear. If you chose automation then all the required wiring is undertaken. If you chose a roller door, which does not require a frame, the brickwork or render where the frame was located will be made good.

4

Finally, we undertake a series of thorough checks to ensure that the door is balanced properly, opens and closes easily and quietly, electrics are working, including lights and alarms, and we will show you how everything works before finally clearing up and leaving your garage ready for use again.
