Making it happen

Say hello...

to added kerb appeal

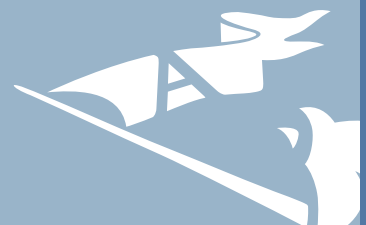

Anglian have a history of quality home improvements that goes back 50 years, so quality is guaranteed with everything we do for you.

If you have a problem of old, rotting and leaking Rooftrim – fascia, bargeboards and cladding, gutters and downpipes – we're here to help. In fact we'll help you stop the rot, cure the leaks and transform the look, and value, of your home to create real kerb appeal!

And you can say goodbye to regular maintenance too, which means no more climbing up ladders to attempt tricky and time consuming DIY and painting, which will only need doing again.

with...

Anglian Home Improvements

PVC-U Rooftrim does away with all the problems of regular maintenance, peeling paintwork, rotten timber and water ingress as the timber rooftrim degrades. It also vastly improves the look of your home.

Before

After

Stop the rot

Make a difference...

made to last

No one wants water to find its way into their home, it creates damp patches and no end of other damage. But if this is a problem you're suffering from, or if your Rooftrim's looking like the weather and local bird and insect life are taking their toll, at Anglian we have the solution.

Before we fit fascias, soffits, bargeboards and cladding, we ensure that all traces of rotten wood and insect and bird infestation is removed first. That means we can be sure that we are fitting direct to a sound substrate and you can be sure that once they are fitted, you can forget them!

But it's not just about peace of mind, we want your home to look great too! Our collection of stylish PVC-U products are now complemented by three superb ranges of external cladding.

Take a look through the following pages and find out how to improve the look and feel of your home.

Fascia, soffit and bargeboards

Better protection...

for many, many years

Anglian's range of long lasting, hardwearing PVC-U fascia, soffit and bargeboards all look exceptional, and there's a great choice of colours to choose from. But, just as importantly, they'll also remove all your maintenance problems.

They are made to protect your home from the Great British weather, keeping the wind and the rain out, and providing a firm anchorage to make sure your guttering stays in place. This means you won't be faced with any costly or time-consuming repairs. What's more, you'll never need to climb up a ladder to paint them either!

We pride ourselves on providing a full service from start to finish of your project. If our surveyor suspects asbestos in your home we will send samples for detailed analysis. For the safety of you and your family, and our own installation team, any asbestos will then be thoroughly and professionally removed.

We're here to provide better protection for your home, as well as to help make it look great.

PVC-U Shiplap

PVC-U Tongue and Groove

Exterior cladding instantly transforms your home with a great choice of styles and colours. Manufactured from PVC-U, our cladding range can help improve the insulation of your home – offering better thermal efficiency than brick, concrete or wood.

PVC-U Embossed Featheredge

Cladding

Clean lines...

to complement your home

Our stylish collection of high quality, low maintenance cladding will be a stunning addition to your home: an instant transformation, in fact.

We have three options of cladding to suit all property types.

Hardwearing, authentic looking, white PVC-U tongue and groove is perfect for replacing rotten timber cladding and will complement any style of home.

PVC-U shiplap cladding has an attractive flat finish. There are seven fabulous colours to choose from which will complement perfectly with our PVC-U window and door colours.

Then there's embossed featheredge cladding, which is also available in eight subtle colours to enhance any project. Featheredge offers an ideal solution for those wanting an appearance that mixes the traditional with the contemporary.

Make it yours...

and enjoy a cheerier exterior

Our stylish and robust Rooftrim products provide the finishing touch to ensure your home looks stunning, year after year. Made from either PVC-U or aluminium, there's a great choice of colours and finishes, so you can pick the perfect style to complement your home.

Fascia, soffit and bargeboards

- 1 Fascia**
Strong, sturdy fascia boards interlock at right angles to the soffits and support the guttering.
- 2 Soffit**
One board in every length includes a ventilation grille to allow air to circulate within the roof space and reduce the risk of condensation.
- 3 Bargeboards**
Anglian's PVC-U bargeboards look like real wood and are fitted in the same way, using marine grade 314 austenitic stainless steel pins.

Water butt and diverter

A real green plus

Don't lose all that precious rainwater! With a water butt connected to your downpipes, you'll have litres of rainwater on tap to keep your garden watered and healthy. It'll save money if your water is metered and it's kinder to the environment, recycling valuable rainwater.

Guttering & Downpipes

Two ranges available

Classic range PVC-U perfection

The Classic range of sturdy, long lasting PVC-U gutters and downpipes provide a perfect match to the rest of the Anglian PVC-U Rooftrim collection. They come in a choice of half round, deepflow, ogee and square and are available in white, light grey[†], black, brown and anthracite grey finishes. They also feature our advanced Gutterguard system to keep them free from leaves and debris.

[†] Light Grey available in half round and deepflow only.

Traditional range Great looks, great performance

The Traditional range mixes all the attributes of PVC-U with the look of traditional cast iron – a brilliant combination to enhance your home. They really do look superb as the authentic ‘cast’ appearance is cleverly replicated in the black PVC-U extrusion, just right for either a new or period property. The Traditional range of gutters and downpipes are all half round and include eared shoes, coach bolts and hopper heads. They also feature our innovative Gutterguard system.

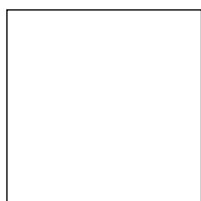

Colours to complement

Complete the look

At Anglian, you're not just limited to just black or white when it comes to choosing your fascia, soffit and bargeboards. Both classic black styles and premium-looking white options are available. But there's also a selection of other colour choices. That's because we want to make sure you can really complete the overall look of your home, by complementing the period of your house or matching your rooftrim to existing windows and doors.

Making a mark

The finer points are important

All our products are manufactured to the relevant British Standards and where possible seek approvals from rigorous third party bodies – not every company does this - ensuring that our products meet the very highest of industry standards always.

We also take our guarantees seriously, with a full 10 years guarantee for PVC-U and Aluminium products.

*Exclusions apply. # Anglian windows with a WER rating of A or above are endorsed by the Energy Saving Trust and can carry the Energy Saving Trust 'endorsed product' logo

Making it happen

Your project takes shape

From the moment you contact us, to the completion of your installation, you can be assured that we will be dedicated to giving you the best and most trouble-free service possible throughout the whole project.

At Anglian, we have 55 years of experience in making and fitting all types of Rooftrim and cladding. That means we provide all the know-how, advice, experience, materials and excellent workmanship to ensure the installation runs smoothly and efficiently.

We know how important it is that your home looks great. Not to mention how essential it is that it effectively keeps out the wind and the rain! We want you to be absolutely delighted with the end result – and we are determined that you will be.

1 The quotation

When you contact us, an Anglian sales consultant will visit you to answer all your questions, take nominal measurements and give you a free, no obligation quote.

2 The survey

One of our experienced surveyors will come and take accurate installation measurements and confirm your requirements. From this survey, we will manufacture the Rooftrim for you.

3 Safe asbestos removal

If the material is not asbestos or is asbestos cement, we will remove it. If the material is the more hazardous asbestos insulation board (AIB) we can on your behalf employ a specialist contractor, licensed by the HSE, to remove it safely.

4

Before we start

We make sure that your property is protected from dust and debris from the removal of the old rooftrim. We use custom built access equipment to access your roof and ensure our people make the best job of your Rooftrim.

5

Getting started

The first row of tiles is carefully removed to reveal the old sarking. The old guttering, fascia and soffit is carefully removed and the sarking trimmed back. Now the ends of the rafters are ready to be inspected.

6

Noggins

We check the condition of the rafter ends and strengthen them by cutting and fitting new Noggins. The new Noggins are cut from pressure treated timber. All work at this stage will be accurately checked to ensure correct sight lines.

7

Mounting your new fascia

The repaired rafter ends can accept the new fascia boards and these are held to the rafters with marine grade stainless steel pins which ensure a long lasting hold.

8

Eaves Shield and Bird Comb

The Eaves Shield is mounted under the first row of tiles, which rest on the integral bird comb, preventing access by nest building birds and vermin.

9

New guttering

We then mount the new guttering of your choice to the fascia using stainless steel fixings. The run of guttering is checked before fixing and downpipes are installed as required.

10

Retiling your roof

The roof tiles are replaced in position ensuring the Bird Guard is working correctly to prevent access by birds and vermin.

11

Finally

When complete, we thoroughly check the installation including all the fixings and give your new fascia a wipe down. We remove all the access equipment and take up the protective tarpaulins to leave your property clean and tidy.

12

Your Guarantee

We are confident that our products and service are the best on the market. We back this up with a comprehensive 10 year guarantee on all Anglian Rooftrim and Cladding, giving you complete peace of mind and confidence in your investment.
